Server configuration

Parameter name	Value
ADR cleaner retry timeout.	0
ADR Preallocation Factor.	0
affinity I/O mask	0
affinity mask	0
affinity64 I/O mask	0
affinity64 mask	0
Allow cross db ownership chaining	0
Allow enumeration of filesystem	1
Allow INSERT into a Hadoop external table	0
Allow recursion for server level triggers	1
Allow remote access	1
Allow the use of the REMOTE_DATA_ARCHIVE data access for databases	0
Allow triggers to be invoked within triggers	1
Allow updates to system tables	0
Allows execution of external scripts	0
Automatic soft-NUMA is enabled by default	0
Blocked process reporting threshold	0
c2 audit mode	0
CLR strict security enabled in the server	1
CLR user code execution enabled in the server	0
Configure SQL Server to connect to external data sources through PolyBase	0
Configure SQL Server to connect to external Hadoop or Microsoft Azure storage blob data sources through PolyBase	0
Configure SQL Server to encrypt control and data channels	1

when using PolyBase	
cost threshold for parallelism	5
Create DTC transaction for remote procedures	0
cursor threshold	-1
DB connection timeout for full-text protocol handler (s)	60
Dedicated Admin Connections are allowed from remote clients	0
Default fill factor percentage	0
default full-text language	1033
Default hash bucket count for the access check result security cache	0
default language	0
Default quota for the access check result security cache	0
Disallow returning results from triggers	0
Enable checksum of backups by default	0
Enable or disable Ad Hoc Distributed Queries	0
Enable or disable Agent XPs	0
Enable or disable command shell	0
Enable or disable creation of user instances	1
Enable or disable Database Mail XPs	0
Enable or disable Ole Automation Procedures	0
Enable or disable Replication XPs	0
Enable or disable SMO and DMO XPs	1
Enable or disable the default trace	1
Enables contained databases and contained authentication	0
Max number of full-text crawl buffers	100
Max number of full-text notifications buffers	100
Maximum crawl ranges allowed in full-text indexing	4
maximum degree of parallelism	0
Maximum estimated cost allowed by query governor	0
Maximum recovery interval in minutes	0
Maximum size of a text field in replication.	65536
Maximum size of server memory (MB)	2147483647
maximum time to wait for query memory (s)	-1
Maximum worker threads	0
Memory for index create sorts (kBytes)	0
minimum memory per query (kBytes)	1024
Minimum size of server memory (MB)	0
Network packet size	4096
Number of locks for all users	0
Number of open database objects	0
Number of reserved full-text crawl buffers	0
Number of reserved full-text notifications buffers	0
Number of user connections allowed	0
Priority boost	0

Recovery policy for DTC transactions with unknown outcome	0
remote login timeout	10
remote query timeout	600
scan for startup stored procedures	0
set working set size	0
Sets the FILESTREAM access level	0
show advanced options	0
Tape retention period in days	0
The timeout of the user instance after no connection is made on the server	60
Transform noise words for full-text query	0
two digit year cutoff	2049
Type of enclave used for computations on encrypted columns	0
Use precomputed rank for full-text query	0
User mode scheduler uses lightweight pooling	0
user options	0
When this option is set, plan cache size is further reduced for single-use adhoc OLTP workload.	0
